Dear Hiring Manager,

I am excited to apply for the Data Scientist position at your organisation. With three years of experience in data science, specializing in predictive modeling, statistical analysis, and data visualization, I am eager to contribute to your organisation's innovative projects.

At Lightning Logistics Pvt. Ltd., I built and deployed machine learning models to predict vehicle life and forecast spare part requirements, significantly enhancing operational efficiency. Previously, at Triniti Advanced Software Labs Pvt. Ltd., I conducted analyses to assess lubricant viability and forecast its remaining useful life, delivering actionable insights for maintenance planning.

I hold an MSc in Data Science from GITAM University and a Bachelor's in Statistics from St. Joseph College for Women(A). My technical expertise includes Python, R, SQL, Power BI, and more.

Additionally, I have congenital profound hearing loss; however, with a cochlear implant, I effectively communicate and perform my duties, bringing a unique perspective and resilience to my work.

Your organisation's commitment to technological innovation aligns with my career goals, and I am confident my skills and experience will be a valuable addition to your team. Thank you for considering my application. I look forward to discussing how I can contribute to your organisation.

Yours sincerely,

Shraddha Vasa
